camp fire grill

Any camp fire becomes spectacular by putting this grill on it. Additionally, you can grill food on it, since it is made of food safe steel. After being laser cut the steel is pressed into a 3D pattern by the innovative technique of rubber pressing.

Tjeerd Veenhoven thinks designing is all about experimenting. A product has an unlimited amount of starting points and is a quest for distinction. Unusual material choices and production techniques result in a far from ordinary product.

The colouring is created by the fire you make yourself, creating your own unique piece.

designer

Tjeerd Veenhoven

material

food safe stainless steel

measurements (l/w/h)

53/53/33 cm

colours

steel colour

honour the past, cherish the present, explore the future
